

Thickness and Width Gauge for Narrow Strip and Profile

- high precision contact measurement of passing strip even at extremely high strip speed
- measurement results unaffected by emulsion, oil, dust, steam, vibration
- measures material thickness up to 5 mm, width up to 25 mm; the thickness measurement depth is freely adjustable
- our crowned and polished measurement diamonds do not leave any marks on the strip surface
- very fast automatic zero adjustment
- numerous variations of guide rollers to suit special applications
