

Thickness and Width Gauge for Very Narrow, Thin Strip

- continuous, highest precision contact measurement of passing strip, suitable for watch springs, violin base string wrapping etc.
- reliable width measurement even on thin strip with a thickness of 50 μm
- measurement results unaffected by emulsion, oil, dust, steam, vibration
- measures material thickness greater than 20 μm , width up to 2 mm
- our crowned and polished measurement diamonds do not mark the strip
- also available as a thickness only gauge
